

I am a 3rd-year Nursing student at Centro Escolar University and an aspiring freelance web developer with a passion for technology, creativity, and digital design. In 2022, I gained experience in e-commerce and dropshipping using Shopify, where I handled product listing, online marketing, and product promotion through Facebook Marketplace and social media. In 2025, I managed a small online business focused on computer parts such as CPUs, motherboards, and RAM, creating promotional content using Canva.

My experience in online selling led me to freelance graphic design from 2024 to 2025, where I created logos, social media advertisements, and promotional materials for small businesses using Canva. I also have knowledge and hands-on experience in HTML, CSS, and JavaScript, and I use Visual Studio Code to build and improve web projects. I am adaptable, creative, and eager to continuously grow my skills in web development and digital design.

Freelancer

2024 - 2025
